

OLEG SAVELIEV

Senior Delivery Manager | AI/ML & GenAI Programs

✉ osaveliev@gmail.com  linkedin.com/in/oleg-saveliev

Summary

19 years in IT, 10+ years with end-to-end accountability for complex, high-stakes programs. Started in technical support, moved into release management at Luxoft, then program management across finance, betting, and security domains. Since 2019 focused on AI/ML — first as Technical Program Manager for Ring (Amazon), later as Delivery Lead running Ring's AI/ML portfolio. Returned to EPAM in 2026 as Delivery Manager — Generative AI.

Experience running up to 13 concurrent AI/ML programs and coordinating up to 100 stakeholders and team members, with distributed teams spanning the US, Europe, and Asia. Lead through other leaders — direct reports have been managers and TPMs. Own delivery outcomes — scope, quality, timelines, staffing, budget execution.

IN AI/ML DELIVERY LEADERSHIP SINCE 2019

- ◆ Shipped flagship camera and doorbell AI/ML features on time across the portfolio, with customer satisfaction sustained above 4.0
- ◆ Led a simultaneous 13-device launch reaching 10M+ users — recognized company-wide by the Ring founder
- ◆ Rebuilt the AI/ML program governance framework and drove adoption across the R&D organization
- ◆ Currently own end-to-end GenAI delivery for enterprise clients, embedding AI tools across the development lifecycle

Experience

03/2026 — Present
Kyiv, Ukraine

Delivery Manager — Generative AI

EPAM Systems

End-to-end delivery of GenAI/ML programs for enterprise clients; cross-functional team of 30+ (BA, QA, FE, BE, UI/UX, DevOps, AI/ML).

- Own end-to-end program delivery — scope, quality, timelines, staffing, and budget — and partner with account management on P&L planning, forecasting, and margin performance.
- Drive AI adoption across the program in partnership with the AI Enablement department: embedding AI-powered tools into the end-to-end development lifecycle and reshaping how the team plans, builds, tests, and releases.
- Align engineering teams around clear technical roadmaps and priorities; partner with architects to translate client needs into robust, actionable solutions.
- Build and coach a high-performing, outcome-driven team culture; maintain executive-level client relationships through disciplined planning and communication.

Kyiv, Ukraine

Delivery Lead — AI/ML Programs, IoT

SQUAD (client: Ring, an Amazon company)

Led Ring's AI/ML program portfolio through a team of Technical Program Managers, serving as the senior escalation point for program risk.

- Owned end-to-end delivery of Ring's AI/ML portfolio through a team of Technical Program Managers — set direction and priorities, ran the operating cadence, and remained accountable for every program outcome.
- Shipped flagship camera and doorbell features on time across the portfolio, with customer satisfaction sustained above 4.0.
- Ran the full people-management cycle for the TPM team: 1:1s, performance reviews, goal setting, and promotion readiness — coaching through high-stakes escalations and stepping in directly when delivery was at risk.
- Built the team: drove hiring and structured development plans aligned to business priorities.

07/2019 — 03/2022
Kyiv, Ukraine

Technical Program Manager

SQUAD (client: Ring, an Amazon company)

Program ownership across Ring's AI/ML portfolio for flagship camera and doorbell products.

	- Owned up to 13 concurrent AI/ML programs end to end, coordinating 40–80 stakeholders across Applied Science, Firmware, Hardware, Product, QA, Data, Integration, Go-to-Market, and Legal. - Delivered 12 major motion-detection algorithm features on time across 13 device types; every release met its KPIs with customer satisfaction above 4.0, reaching millions of customers globally. - Led the most complex AI/ML delivery in the portfolio — a simultaneous 13-device launch of a new motion-detection algorithm and radar-based sensing — recognized company-wide by the Ring founder. - Rebuilt the AI/ML program governance framework from the ground up: ran pilots, iterated, and drove adoption across the entire R&D organization.
12/2018 — 07/2019 Kyiv, Ukraine	Program Manager — Finance, Betting & Security Domains Innovecs - Managed fixed-price programs with 40+ engineers, shortening delivery timelines by 20% with zero major overruns while maintaining quality and stakeholder alignment. - Coordinated multi-team deliveries amid shifting priorities, applying ICAgile practices across the portfolio and driving process improvements that scaled client capacity.
08/2017 — 12/2018 Kyiv, Ukraine	Release Manager — Betting Domain GR8 Tech <i>All release and delivery operations for a portfolio of 16 interrelated products; 2 direct-report managers and ~28 engineers across DevOps and Support.</i> - Restructured the release process for a monolith-to-microservices migration, accelerating project delivery by 40%. - Improved incident management, cutting production resolution time by 20–30% and directly supporting 30% growth in concurrent online clients. - Introduced predictive release planning and stakeholder reporting, giving business leaders full visibility into upcoming releases and feature timelines.
02/2013 — 08/2017 Kyiv, Ukraine	Release Manager — Finance Domain Luxoft <i>Global release management for a trading platform: led an 11-person release management team and coordinated ~60 engineers across Singapore, the US, the UK, and Ukraine.</i> - Achieved a 97% successful release rate across 60 releases with zero rollbacks, continuously improving the remainder through SDLC enhancements. - Designed and implemented the full SDLC process from scratch, consolidating releases by 50% while maintaining quality and time-to-market and significantly reducing risk. - Migrated and updated 100% of the trading platform with no impact on system stability or performance; established consistent release practices across all four regions.
2007 — 2013 Kyiv, Ukraine	Early Career — Technical Support EPAM (finance / trading platform) · Software MacKiev (consumer software) - At EPAM, led 1st/2nd-line support for a global trading platform as the primary escalation point in a 15-member team, consistently meeting SLAs and KPIs and reporting to the Service Delivery Manager. - At Software MacKiev, resolved customer issues for consumer software products within a 9-person support team.

Education

2003 — 2009 Kyiv, Ukraine	State University of Information and Communication Technologies Degree in Information Technologies
